

R2H-4

World standard originally patented by Sakai in 1970s

STATIC THREE WHEEL ROLLER

Versatile static three wheel roller for various types of paving compaction jobs

Best Compaction Quality and Efficiency

- Equal static linear pressure across all drums provides uniform compaction.
- Articulated center-point steering.
- The all-drum hydrostatic drive with the largest diameter drums leaves a smooth finish and minimizes pushing and shoving of hot mix asphalt (HMA) mat.

Eco Mode (R2H-4)

- Sakai's new ECO compaction mode (ECM), which reduces fuel consumption up to 40%.

High Safety Standards

- 1 m × 1 m visibility.
- Emergency brake pedal is standard.

Easy Maintenance

- Easy access to engine, hydraulics, devices, filters, etc. from ground.
- Sprinkler system with anti-clog package, i.e., a plastic water tank, triple-protection filtration, etc., and with perfect draining winterization.
- Direct access to spray nozzles from operators station.
- Rugged articulated center-pin joint.
- KUBOTA V3307 engine features OHV4 valve and Turbo that maintains output even at high elevations.
