

SUMITOMO Remote Monitoring System

# G@Nav

## Supports your bussiness operation in every way.

Real-time data helps to minimize equipment downtime and ensure operating conditions are safe.

Catch management information on any device in real-time.

### 5 Advantages

#### Fuel Consumption

Allows you to monitor the amount of fuel consumed in details, which helps to maximize the efficiency of machine operation.

#### Management

Know your machine's detailed operating hours and locations at your fingertips to visualize your fleet management.

#### Maintenance

Receive alerts for periodical replacement parts and ensure your machine is backed up with preventative maintenance.

#### Trouble-Prevention

Sends out warning message immediately for troubleshoot to minimize machine downtime.

#### Security

Lock your machine remotely with Geofence in case of unexpected operation.

# FVM for greater worksite safety.

The optional FVM (Field View Monitor) makes it so much easier for operators to check for safety around worksites, with an in-cabin monitor displaying the area behind the excavator that is usually difficult to see. FVM is an advanced safety system engineered to bring innovation to the worksite.

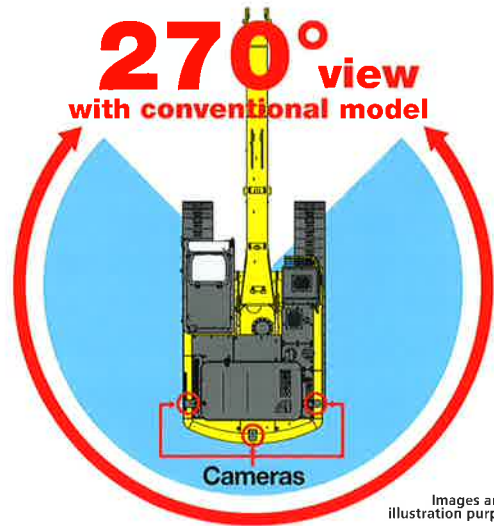

**Wide field of view!  
See 270°  
to the rear!**

Assists operator safety checks, as well as ensuring safety for the excavator and nearby personnel.

- ① Large, high-definition monitor
- ② Top-down view for 270° coverage
- ③ Proprietary image processing technology
- ④ Clear displays, even at night
- ⑤ Switch camera views easily

\* The FVM is a support system for checking the safety of the surroundings; it does not prevent collisions with obstructions.  
Reliance on the FVM during operation should be avoided, and remember to work safely.  
\* FVM is a registered trademark of Sumitomo Heavy Industries.

Available as an option for the Dash 6 series.
